

Shelby Daytona Cobra Coupe - the master piece that conquered Europe

Shelby Daytona Cobra, the master piece that conquered Europe. This one was originally built for the 1964-65 racing season using the 289 Shelby Cobra roadster chassis in response to the Ferrari's 250 GTO. The car with the two white stripes earned its title as the "super car". This one is a legend which won Le Mans 24 hour race in 1964, and helped Ford win the World Manufacturers Championship in 1965, Cobra is certainly topping any mans dream car list.

Daytona is a vehicle which single handedly earned the winning position from the Ferrari's consecutive wins from 1960s to 1965. It was a successful collaboration of Carol Shelby and Ford which crafted this GT40 Daytona version; this is the wonder which won the Daytona by beating the Ferrari from 1966 to 1969.

Take a look at this piece of art with a descriptive elaboration below

Being a super car, this one is immensely comfortable and extremely fast, going from 0 to 60 mph, under 4 seconds. Today we are lucky to find numerous fast cars that give the over whelming speed and power as crafted and structured by latest automobile manufacturers, where as, on the other hand there is the 1965 Shelby which gives greater or almost equal head on competition to today's leading super cars.

Shelby has a vast range of amazing muscle cars to their port folio today. Imagine the Shelby GT 500 one of its remarkably crowned super sports muscle car. The outstanding performance and creation of the Daytona cobra which not only defeated the Ferrari teams consecutive victory in a blow but also made its ostentatious debut in the market with its ground breaking performance at the Le mans Daytona, marking its mark as the leading race car whilst defeating the Ferrari team.

When we are talking of the Shelby Daytona Cobra Coupe we are speaking of excessive power muscle machine, which not only exerts unmatched power but also unparalleled top speed and performance. This 427 AC cobra has a V8, 485 brake horse power, 362 kilowatts with an amazingly top speed of 290 km/ hour.

In this fast paced world today, we have all these top performing muscle machines like Ford, Ferrari, Porsche, Jaguar, BMW and Mercedes etc bring out their various versions and models each day after enormous research and unlimited testing trying to compete with each others models. Innovating latest engines, safety and mechanical advances; devising and improvising creating latest designs and mechanical break through machines. Where as, on the other hand we have the 1965 Shelby Daytona Cobra coupe which goes head on with today's technology when it comes to extreme sports cars competing on the basis of speed, performance and pace.
