

Mental Math Exercise Book

As a concerned parent, you need to be on the lookout for books and practice sheets that may help your child have an easier time at school. If you wish to help them with their mental math skills, then the Mental Math Exercise Book is a must-have.

What makes this book so special? Well, for starters it has more than 42 math tests that are specifically designed for students in middle school. Second, this amazing book also comes with double-sided bookmarks that can be of further use to your child. The tests included in this book cover mental math equations and problems that have been used in SAT tests and other national tests. It is perfect for children that fall in the age bracket of 7 to 11 years.
